

Introduction

This collection of good practice aims to support NHS employers with their work experience activity. It highlights examples, top tips, and useful resources to equip employers to set up work experience opportunities and establish buy-in from senior leaders and supervisors.

A key resource for this work is NHS England's [More than Photocopying Work Experience - A Toolkit for the NHS](#). This comprehensive toolkit defines the different types of work experience, and their benefits, and includes editable templates to help set up placements.
